

3. Forecast future values and get historical residuals

Use previously trained models to predict future values and/or get historical residuals
 Plugin documentation [🔗 \(https://www.dataiku.com/dss/plugins/info/forecast.html\)](https://www.dataiku.com/dss/plugins/info/forecast.html)

MODEL SELECTION

Mode Select manually or automatically select model with lowest error

Model to use

Baseline
Neural Network
ARIMA
Seasonal Trend
Exponential Smoothing
State Space

PREDICTION

Include history Historical values, one step forecasts and residuals (historical value - forecast)

Include forecast Forecasts along the time series

Forecast horizon in number of time steps - will be overridden if you provided external regressors

Confidence interval %
